Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-16, 18-25, 34-35, drawn to an apparatus for converting data input in serial format into a parallel format, classified in class 370, subclass 366.
- II. Claims 17, 26-33, drawn to an apparatus for converting data output from a parallel format into a serial format, classified in class 370, subclass 366.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions 1 and 2 are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination

as claimed because invention 1 teaches the distinguished feature of a storage element associated with each serial data input channel and means for enabling data input from said data bus to at least one of the storage cells in the storage element and for enabling the buffering element to buffer the data onto the data bus portion in accordance with a predetermined input cycle. The subcombination has separate utility such as invention 2 teaches the distinguished feature of a storage element associated with each serial data output channel and means for enabling data output from at least one of the storage cells in the storage element on the data bus and for enabling the buffering element to buffer the data onto the data bus portion in accordance with a predetermined output cycle.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Bartels on 5/15/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuongchau Ba Nguyen whose
